

# EcoSystem EM Suite

For IT & Test Environment Management

**WEAK “IT & TEST ENVIRONMENTS MANAGEMENT” IS A LEADING CAUSE OF LOW IT PRODUCTIVITY AND LEADS TO INFRASTRUCTURE & LICENSE MIS-SPEND.**

Common issues organisations face:

- IT Environment Outages and/or Instability
- IT Environments “Not Fit for Purpose”
- Slow and/or Untimely IT Environment Operations
- Infrastructure Proliferation & Overspend
- Poor IT decision making through poor insight
- Unmanageable Project Contention / Chaos

*Refer: \*World Quality Report (2015) estimated an average of 20% DevTest productivity was lost due to Environment issues.*

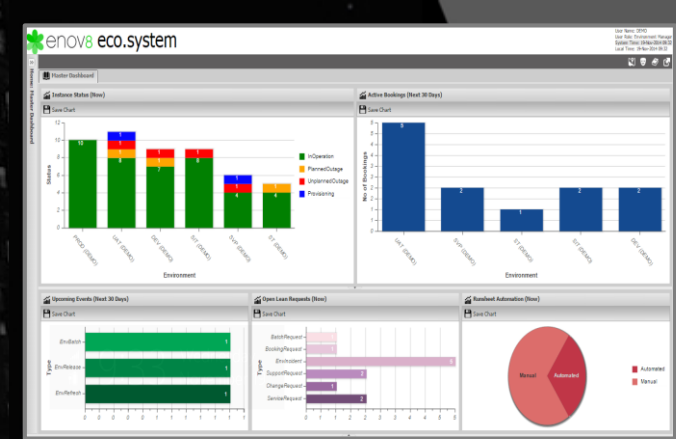

Enov8 propose to improve organisations Environment Management capability through the implementation / establishment of a solution that drives GMSA:

- **GOVERNANCE,**
- **MEASUREMENT,**
- **STANDARDISATION &**
- **AUTOMATION.**

The primary objectives of our solution (EcoSystem EM) is to establish transparency and discipline, where there was once chaos, and ultimately improve IT agility and reduce your IT spend.

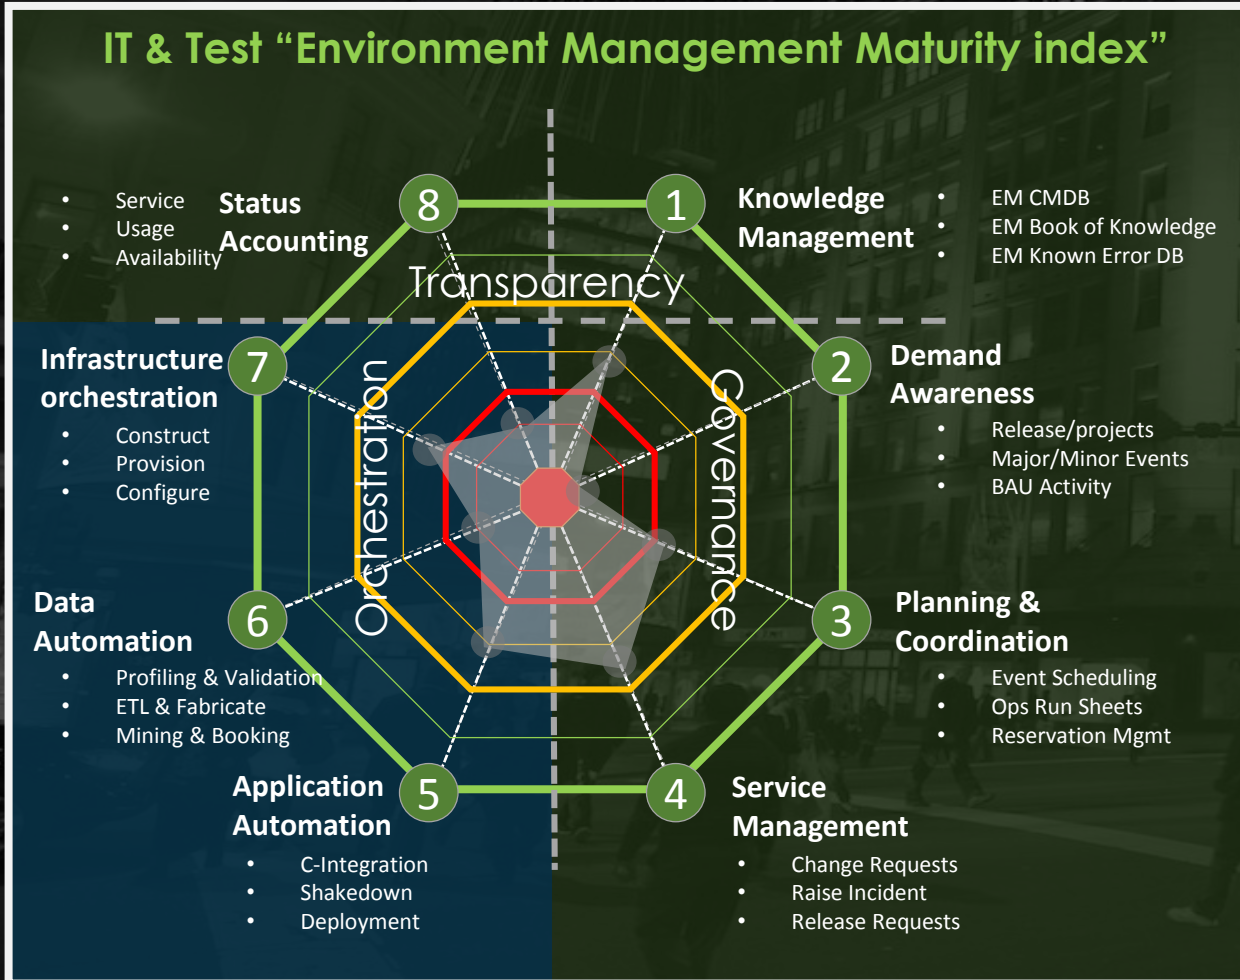

## Some of the Key Features of EcoSystem EM:

- ✓ ENV Dashboards
- ✓ ENV Reports
- ✓ Advanced CMDB
  - IT Elements
  - Business Elements
  - Relationships
- ✓ Project Demand Mgr
- ✓ Test Env Booking Mgr
