ECOSYSTEM FOR
TEST DATA MANAGEMENT

TEST DATA MINING & BOOKINGS

- DataView Suite is a unique solution which promotes tester agility through the use of “self-service” Test Data Mining, Booking and Governance Mechanisms.

PROBLEM STATEMENT

- Mining for test data is complex
- Business acumen related searches are time consuming
- Data contention and corruption is common
- Test data Issues impact testing productivity
- Mismanagement causes storage cost blowout

CAUSE

- End to End data architectures are complex & diverse
- Search/Fulfilment often dependent on many SMEs
- Many projects but too few test environments
- Data is often not fit for purpose i.e. has integrity issues

BENEFITS OF DATAVIEW

Tester Up-skilling via data simplification

Safe sharing of data (contention avoidance & less DRDs)

Reduced spend through storage consolidation

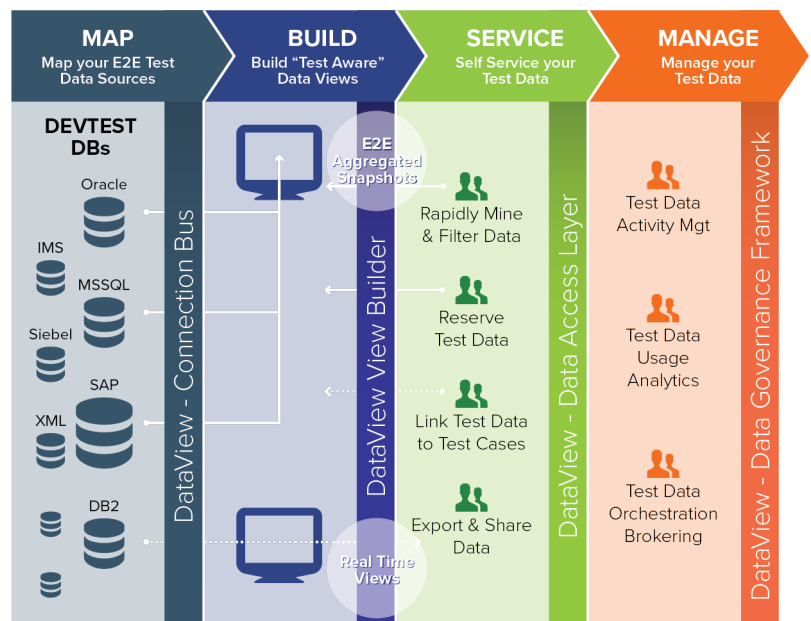

Proliferation avoidance through data usage analytics

Cost recovery through “usage-based” chargeback

Testing productivity through rapid accessibility & uptime

DataView aims to improve DevTester productivity by ensuring complex E2E data is immediately understandable, accessible, “fit for purpose” and protected from misuse or corruption.
