REMOVE THE TEST & DELIVERY PAIN OF COMPLEX TEST ENVIRONMENTS.

Enov8's IT & Test Environment Management platform helps organizations uplift productivity, across production and non-production, through better visualization of your systems, centralized planning and coordination, operational standardization, and automated orchestration.

WHO NEEDS ENOV8?

The Enov8 solution is for any team requiring better knowledge & control of their IT Environments.
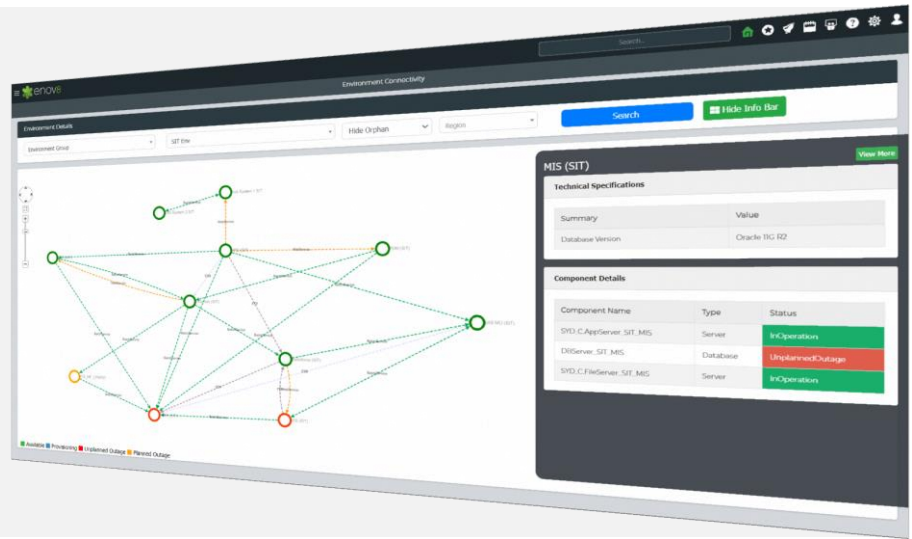

This includes:

✓ Test Environment Teams,
✓ System Teams,
✓ Release Management,
✓ Deployment Teams,
✓ Disaster Recovery,
✓ Production Support &
✓ Cloud/DC Migration.

And ultimately supports the broader IT Project community, including Development & Test.
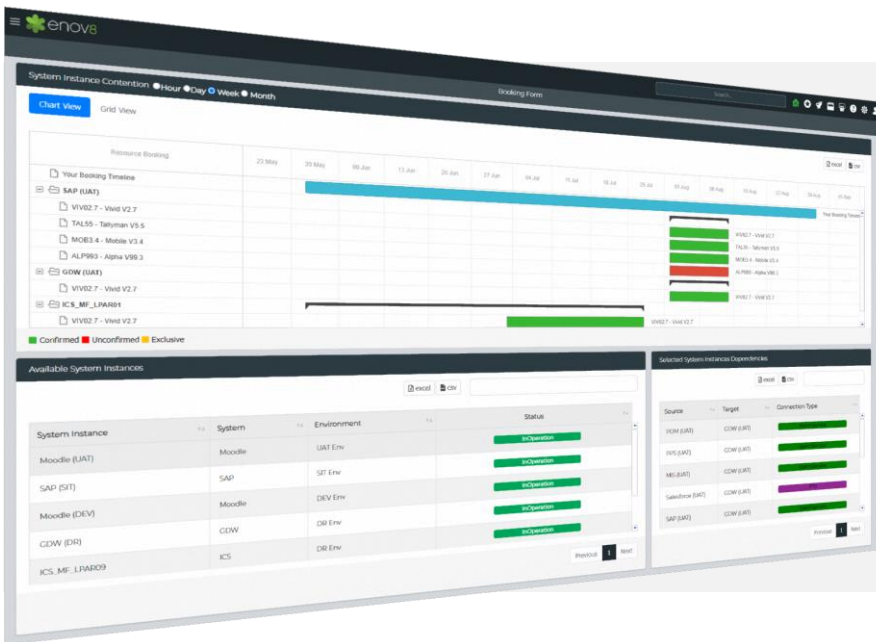

ENVIRONMENT MODELLING

Capture & model your IT & Test Environments. Use the Enov8 solution to model your Environment Groups, Systems, Instances, Micro Services and important data points like Labels, Versions & Relationships.

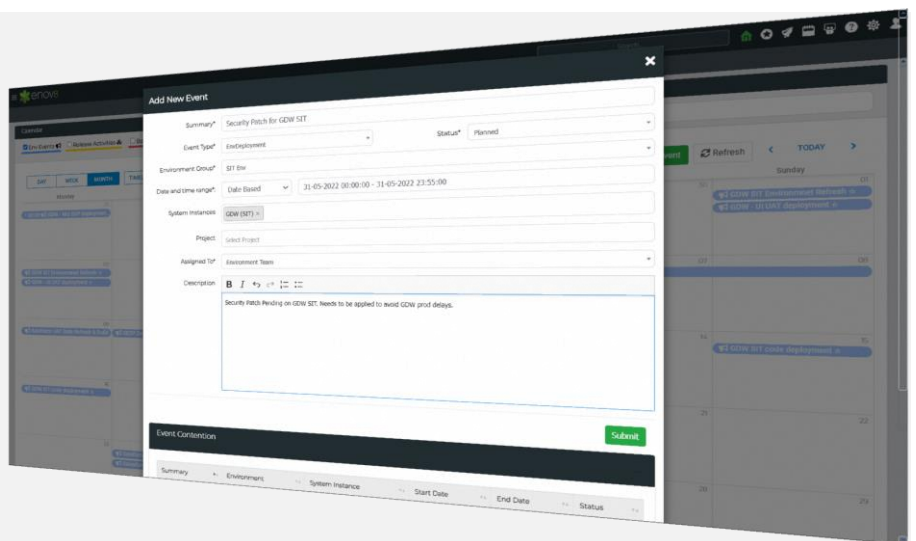

BOOKING MANAGEMENT

Use the Environment Management Booking module to ensure you proactively understand your projects environment requirements and your systems are prepared in advanced and free of contention.

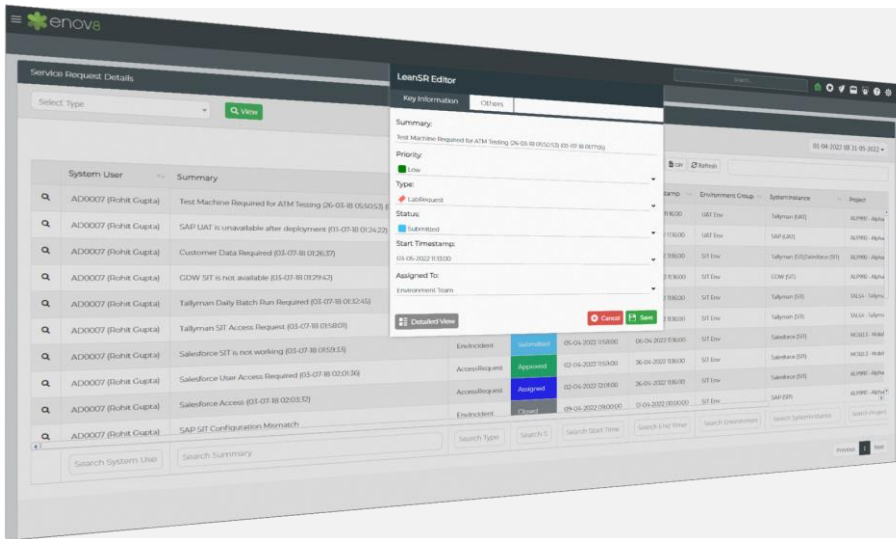

PLANNING & COORDINATION

Coordinate your Test Environment & Deployment events.

The Enov8 platform helps you to plan & manage operations through calendars, implementation plans (aka deployment plans) and System Runsheets.
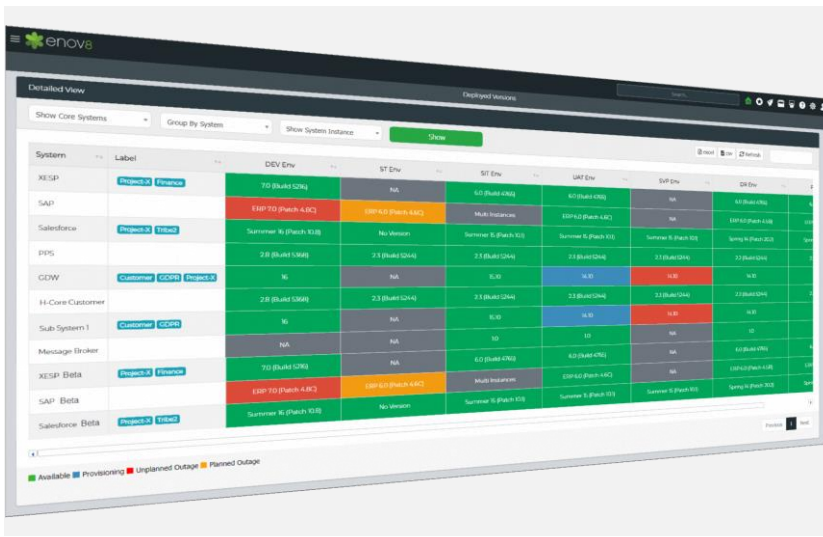

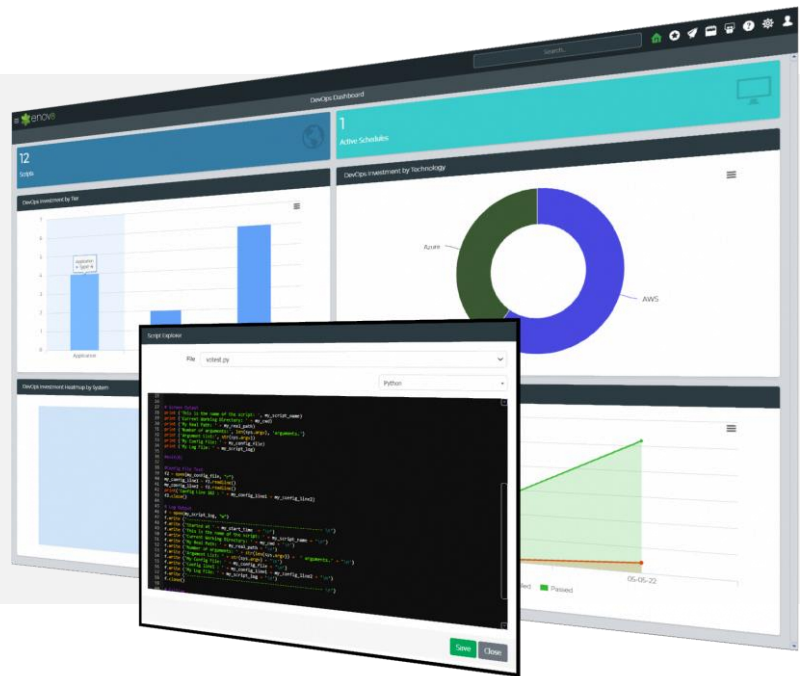

SERVICE MANAGEMENT

Avoid non-production chaos & uplift service using Enov8's Lean Service Management module.

Control Change, Incidents, and your Support requests through a single portal.

DEVOPS ORCHESTRATION

Orchestrate your Test environment activities with Runsheets, Implementation Plans, and Automation.

Our DevOps Manager is code agnostic, meaning you can choose your favorite scripting languages.

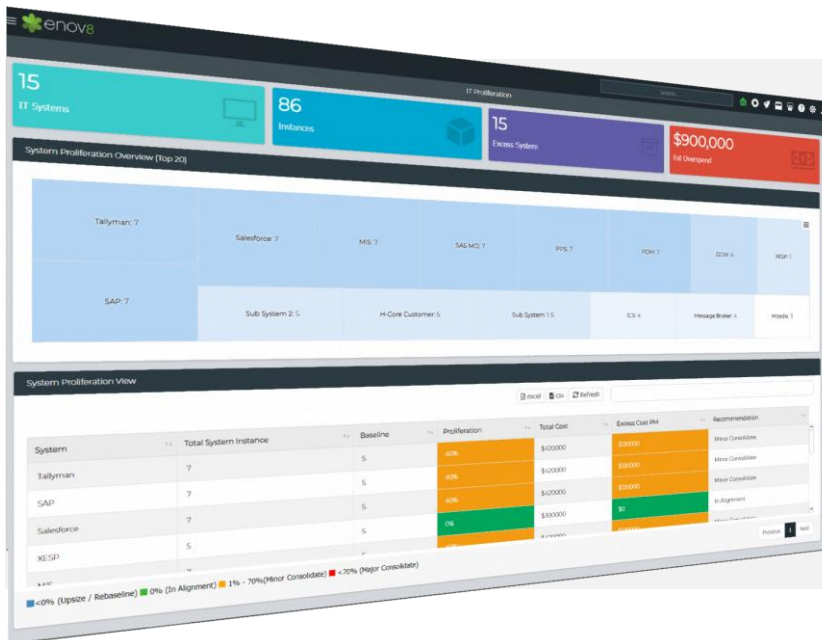

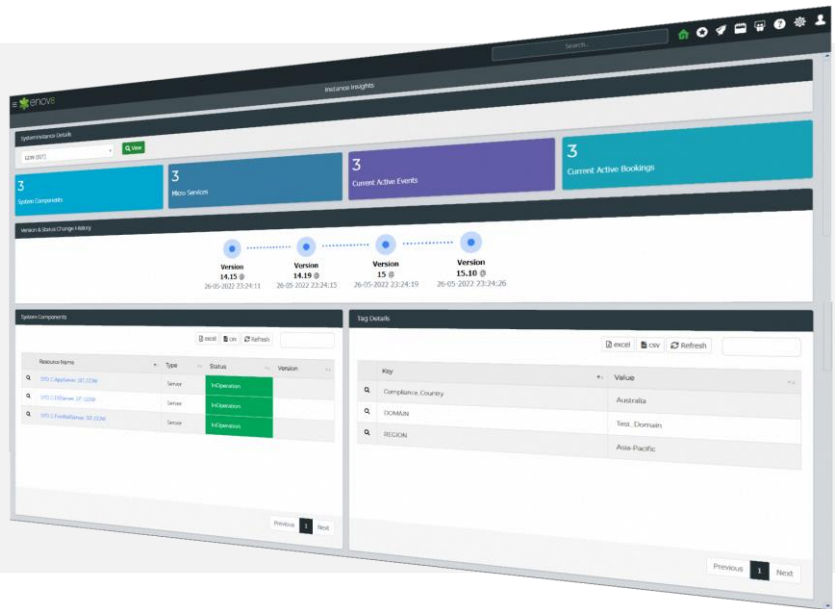

DEPLOYMENT TRACKING

Use Enov8 to track the deployment state of all your resources i.e., Instances, Components & Micro Services.

Quickly identify what version is deployed where and easily recognize environment drift.

INFORMATION WALLS

Get visibility across your test environments & operations in real-time.

Enov8 promotes better analytics, decision making & optimization through out-of-box and customizable Information walls.

FINANCIAL INSIGHTS

Reap the Return of Investment (ROI) of better Environment Management.

On day-one the Enov8 solution provides you with information to start addressing costly issues like IT over proliferation idle system resources.

Benefits

IT COST OPTIMIZATION
Reduced proliferation & IT costs through better management of your IT environment infrastructure, licensing and services.

SITE RESILIENCE
Higher resilience, availability & continuity of your IT & Testing Environments through proactive and repeatable methods.

DELIVERY VELOCITY
Enhanced productivity and streamlined BAU & project delivery through improved environments and data orchestration.

QUALITY COMPLIANCE
Improved quality through timely and fit-for-purpose testing environments. Promoting development, test & acceptance.
